Revision History

Version	Release	Date	Comments
0	1	2019-12-20	First draft of the document.
0	2	2020-02-14	Second draft if the document. Comments from CIM EG were taken into account.
1	0	2020-03-18	Approved by MC.

58

59 **1 Objective**

60 The purpose of this document is to provide the contextual and assembly UML models and the
61 schema of the Acknowledgement_MarketDocument.

62 The schema of the Acknowledgement_MarketDocument could be used in various business
63 processes.

64 It is not the purpose of this document to describe all the use cases, sequence diagrams,
65 business processes, etc. for which this schema is to be used.

66 This document shall only be referenced in an implementation guide of a specific business
67 process. The content of the business process implementation guide shall be as follows:

- 68 • Description of the business process;
- 69 • Use case of the business process;
- 70 • Sequence diagrams of the business process;
- 71 • List of the schema (XSD) to be used in the business process and versions of the
72 schema;
- 73 • For each schema, dependency tables providing the necessary information for the
74 generation of the XML instances, i.e. when the optional attributes are to be used, which
75 codes from which ENTSO-E codelist are to be used.

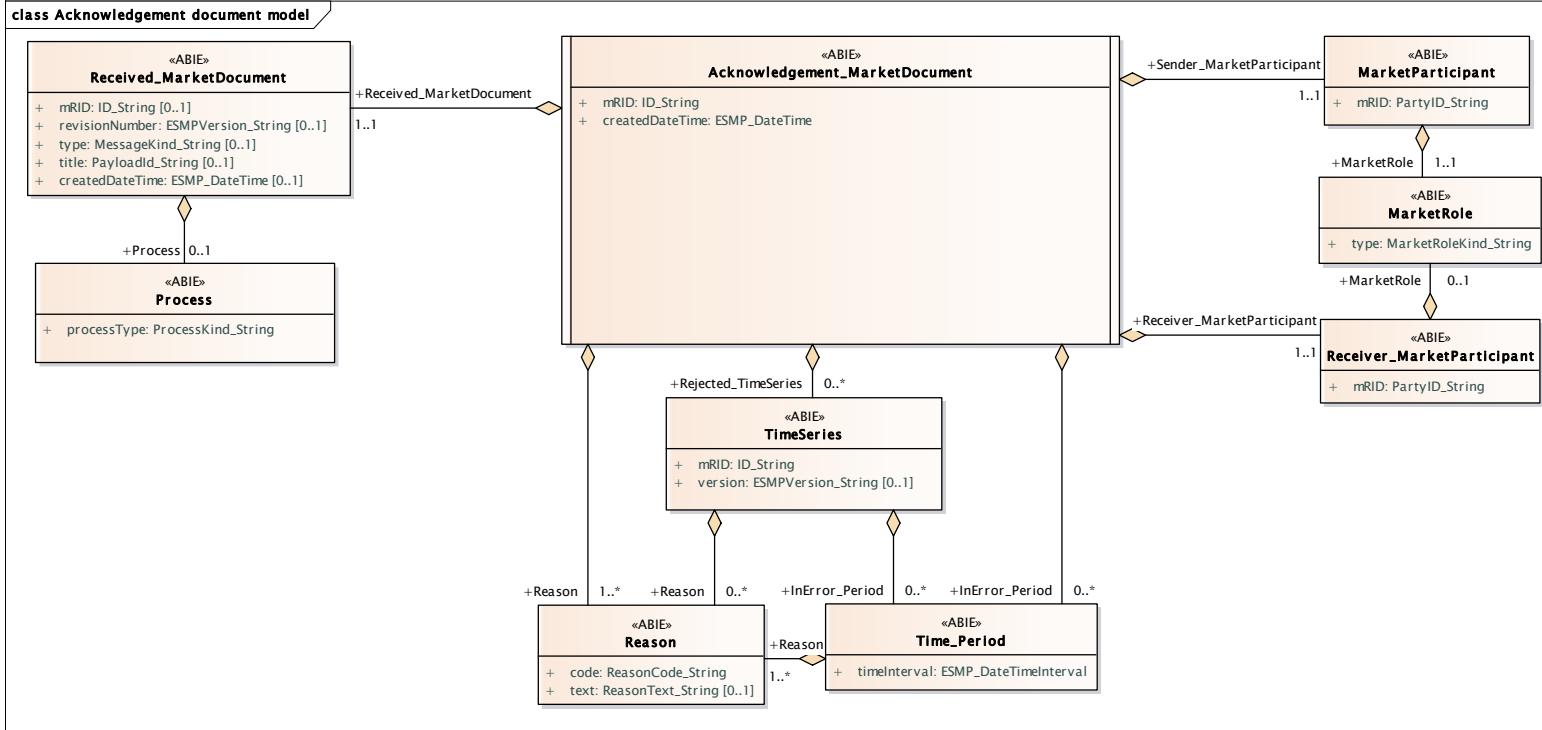

76

77 2 Acknowledgement_MarketDocument

78 2.1 Acknowledgement contextual model

79 2.1.1 Overview of the model

80 Figure 1 shows the model.

81

82 **Figure 1 - Acknowledgement contextual model**

83 2.1.2 IsBasedOn relationships from the European style market profile

84 Table 1 shows the traceability dependency of the classes used in this package towards the
85 upper level.

86 **Table 1 - IsBasedOn dependency**

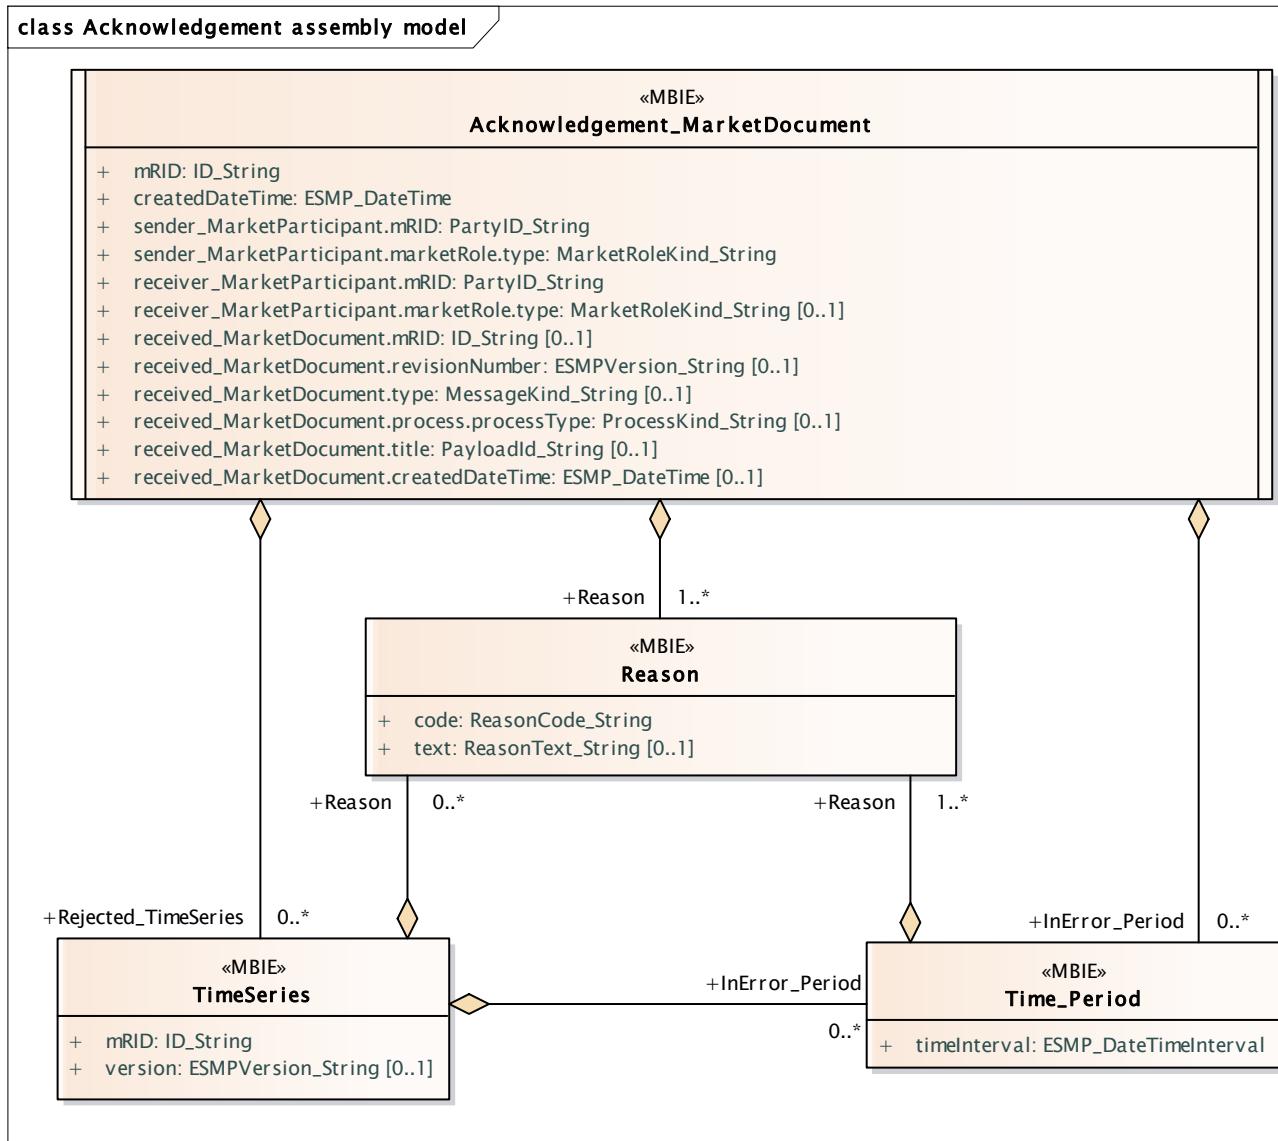

Name	Complete IsBasedOn Path
Acknowledgement_MarketDocument	TC57CIM::IEC62325::MarketManagement::MarketDocument
MarketParticipant	TC57CIM::IEC62325::MarketCommon::MarketParticipant
MarketRole	TC57CIM::IEC62325::MarketCommon::MarketRole
Process	TC57CIM::IEC62325::MarketManagement::Process
Reason	TC57CIM::IEC62325::MarketManagement::Reason
Received_MarketDocument	TC57CIM::IEC62325::MarketManagement::MarketDocument
Receiver_MarketParticipant	TC57CIM::IEC62325::MarketCommon::MarketParticipant
Time_Period	TC57CIM::IEC62325::MarketManagement::Period
TimeSeries	TC57CIM::IEC62325::MarketManagement::TimeSeries

87

88 2.2 Acknowledgement assembly model

89 2.2.1 Overview of the model

90 Figure 2 shows the model.

91

92

Figure 2 - Acknowledgement assembly model

93

94 2.2.2 IsBasedOn relationships from the European style market profile

95 Table 2 shows the traceability dependency of the classes used in this package towards the
96 upper level.

97 **Table 2 - IsBasedOn dependency**

Name	Complete IsBasedOn Path
Acknowledgement_MarketDocument	TC57CIM::IEC62325::MarketManagement::MarketDocument
Reason	TC57CIM::IEC62325::MarketManagement::Reason
Time_Period	TC57CIM::IEC62325::MarketManagement::Period
TimeSeries	TC57CIM::IEC62325::MarketManagement::TimeSeries

98

99 2.2.3 Detailed Acknowledgement assembly model

100 2.2.3.1 Acknowledgement_MarketDocument root class

101 An electronic document that is used to acknowledge the reception of a document and to provide
102 information concerning its basic validity.

103 Table 3 shows all attributes of Acknowledgement_MarketDocument.

104 **Table 3 - Attributes of Acknowledgement assembly**
105 **model::Acknowledgement_MarketDocument**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ID_String	The unique identification of the document being exchanged within a business process flow.
1	[1..1]	createdDateTime ESMP_DateTime	The date and time of the creation of the document.
2	[1..1]	sender_MarketParticipant.mRID PartyID_String	The identification of a party in the energy market. --- The identification of the party that is the originator of the acknowledgement. The originator of the acknowledgement is identified by a unique coded identification. This value should be the same as that found in the receiver identification of the document being acknowledged.
3	[1..1]	sender_MarketParticipant.marketRole.type MarketRoleKind_String	The identification of the role played by a market player. --- The identification of the role associated with the party that is the originator of the acknowledgement.
4	[1..1]	receiver_MarketParticipant.mRID PartyID_String	The identification of a party in the energy market. --- The identification of the party who is the recipient of the acknowledgement. The recipient of the document is identified by a unique coded identification. This value should be the same as that found in the sender identification of the document being acknowledged.
5	[0..1]	receiver_MarketParticipant.marketRole.type MarketRoleKind_String	The identification of the role played by a market player. --- The identification of the role associated with the party who is the recipient of the acknowledgement.
6	[0..1]	received_MarketDocument.mRID ID_String	The unique identification of the document being exchanged within a business process flow. --- This information identifies the document that has been received. The information is extracted from the received document.

Order	mult.	Attribute name / Attribute type	Description
7	[0..1]	received_MarketDocument.revisionNumber ESMPVersion_String	The identification of the version that distinguishes one evolution of a document from another. --- This information identifies the document that has been received. The information is extracted from the received document.
8	[0..1]	received_MarketDocument.type MessageKind_String	The coded type of a document. The document type describes the principal characteristic of the document. --- This information identifies the document that has been received. The information is extracted from the received document.
9	[0..1]	received_MarketDocument.process.processType ProcessKind_String	The identification of the nature of process that the document addresses. --- This information identifies the document that has been received. The information is extracted from the received document.
10	[0..1]	received_MarketDocument.title PayloadId_String	The identification of the name of the file or the payload that has been transmitted. --- This information identifies the document that has been received. The information is extracted from the received document.
11	[0..1]	received_MarketDocument.createDateTime ESMP_DateTime	The date and time of the creation of the document. --- This information identifies the document that has been received. The information is extracted from the received document.

106

107 Table 4 shows all association ends of Acknowledgement_MarketDocument with other classes.

108
109 **Table 4 - Association ends of Acknowledgement assembly
model::Acknowledgement_MarketDocument with other classes**

Order	mult.	Class name / Role	Description
12	[0..*]	TimeSeries Rejected_TimeSeries	The time series in the received document that has been rejected during the initial validation process. Association Based On: Acknowledgement contextual model::Acknowledgement_MarketDocument.[] ---- Acknowledgement contextual model::TimeSeries.Rejected_TimeSeries[0..*]
13	[1..*]	Reason Reason	In case of a received document without error, only one Reason element is necessary to acknowledge it. However, if there are errors then there may be as many Reason elements as are necessary to describe any errors discovered in the received document. At least one reason element must appear associated with the header part of the document. The Reason associated with the electronic document header providing different motivations for the creation of the document. Association Based On: Acknowledgement contextual model::Acknowledgement_MarketDocument.[] ---- Acknowledgement contextual model::Reason.Reason[1..*]
14	[0..*]	Time_Period InError_Period	The time interval that is associated with the received document and which contains error. Association Based On: Acknowledgement contextual model::Acknowledgement_MarketDocument.[] ---- Acknowledgement contextual model::Time_Period.InError_Period[0..*]

110

111 **2.2.3.2 Reason**

112 The motivation of an act.

113 Table 5 shows all attributes of Reason.

114 **Table 5 - Attributes of Acknowledgement assembly model::Reason**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	code ReasonCode_String	The motivation of an act in coded form.
1	[0..1]	text ReasonText_String	The textual explanation corresponding to the reason code.

115

116 **2.2.3.3 Time_Period**

117 The identification of a time interval with errors. It should be noted that the relative position
118 transmit in the original document will have been converted to an absolute time interval whenever
119 errors occur at this level in the acknowledgement document.

120 Table 6 shows all attributes of Time_Period.

121 **Table 6 - Attributes of Acknowledgement assembly model::Time_Period**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	timeInterval ESMP_DateTimeInterval	The start and end date and time for a given interval.

122

123 Table 7 shows all association ends of Time_Period with other classes.

124 **Table 7 - Association ends of Acknowledgement assembly model::Time_Period with
125 other classes**

Order	mult.	Class name / Role	Description
1	[1..*]	Reason Reason	If there are errors at the Time_Period level as many Reason elements as necessary may be used. The reason information associated with a Time_Period providing motivation information. Association Based On: Acknowledgement contextual model::Time_Period.[] ----- Acknowledgement contextual model::Reason.Reason[1..*]

126

127 **2.2.3.4 TimeSeries**

128 The TimeSeries stated as being in error.

129 A set of time-ordered quantities being exchanged in relation to a product.

130 Table 8 shows all attributes of TimeSeries.

131 **Table 8 - Attributes of Acknowledgement assembly model::TimeSeries**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ID_String	A unique identification of the time series.
1	[0..1]	version ESMPVersion_String	The identification of the version of the time series.

132

133 Table 9 shows all association ends of TimeSeries with other classes.

134 **Table 9 - Association ends of Acknowledgement assembly model::TimeSeries with
135 other classes**

Order	mult.	Class name / Role	Description
2	[0..*]	Time_Period InError_Period	The time interval in a TimeSeries that is in error. Association Based On: Acknowledgement contextual model::TimeSeries.[] ----- Acknowledgement contextual model::Time_Period.InError_Period[0..*]
3	[0..*]	Reason Reason	If there are errors at the TimeSeries level as many Reason elements as necessary may be found at that level. The reason information associated with a TimeSeries providing motivation information. Association Based On: Acknowledgement contextual model::TimeSeries.[] ----- Acknowledgement contextual model::Reason.Reason[0..*]

136

137 **2.2.4 Datatypes**

138 The list of datatypes used for the Acknowledgement assembly model is as follows:

- 139 • ESMP_DateTimeInterval compound
140 • ESMP_DateTime datatype
141 • ESMPVersion_String datatype
142 • ID_String datatype
143 • MarketRoleKind_String datatype, codelist RoleTypeList
144 • MessageKind_String datatype, codelist MessageTypeList
145 • PartyID_String datatype, codelist CodingSchemeTypeList
146 • PayloadId_String datatype
147 • ProcessKind_String datatype, codelist ProcessTypeList
148 • ReasonCode_String datatype, codelist ReasonCodeTypeList
149 • ReasonText_String datatype
150 • YMDHM_DateTime datatype
151

152 2.2.5 Acknowledgement_MarketDocument XML schema structure

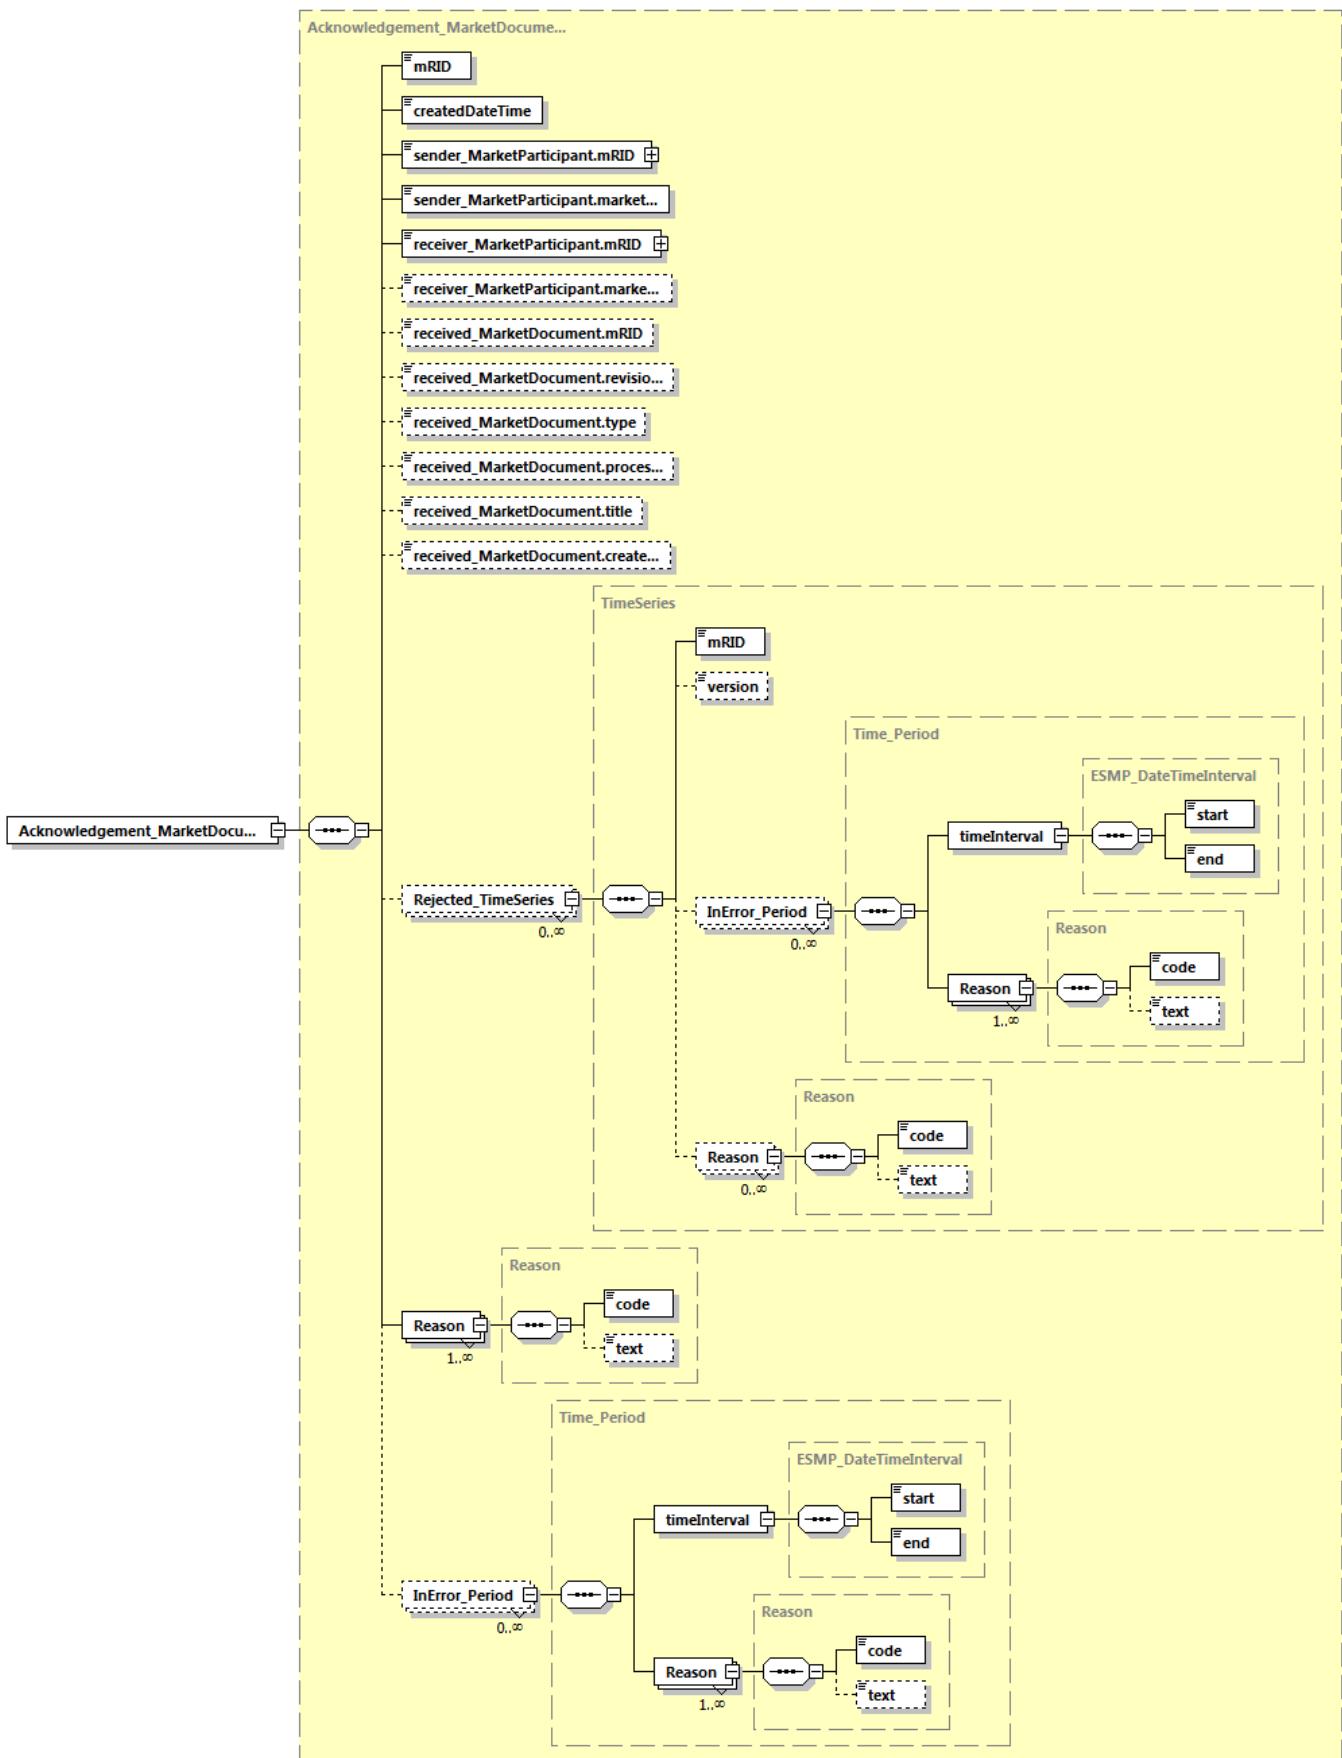

Figure 3 - Acknowledgement_MarketDocument schema structure

155 **2.2.6 Acknowledgement_MarketDocument XML schema**

156

157 The schema to be used to validate XML instances is to be identified by:

158 urn:iec62325.351:tc57wg16:451-1:acknowledgementdocument:8:0

```
159 <?xml version="1.0" encoding="utf-8"?>
