

Appendix A to the TCID - Definition List**1. Definitions:**

Capitalised Term	Definition
Accession Form	means the form in Appendix C (Accession Form);
ACER	means the Agency for the Cooperation of Energy Regulators established as per European Regulation 713/2009 of 13 July 2009;
Affected TSO	has the meaning set forth in Article 13.2.1.;
Agreement (or TCID)	means the TSO Cooperation Agreement for Single Intraday Coupling, including all the Appendices thereto;
Amicable Dispute Resolution Period	has the meaning set forth in Article 16.2.1.;
ANIDOA	means the All NEMOs Intraday Operational Agreement between the NEMOs, setting forth the terms of their cooperation for the MCO Function for the Single Intraday Coupling;
Appendix	means any document attached as an appendix to the Agreement;
Article	means an article of the main body of the Agreement, unless specifically mentioned otherwise;
Best Efforts	means the obligation for a Party, in the performance of its commitments under the Agreement, to take all reasonable actions and measures and more generally doing everything that can reasonably be expected

	from a normal, diligent and reasonable professional placed in the same circumstances;
Breaching TSO	has the meaning set forth in Article 13.2.1.;
BRP	means a Balance Responsible Party;
BRP Contract	means a contract between a BRP and a TSO or another designated Party;
CACM	means the Commission Regulation (EU) 2015/1222 of 24 July 2015 establishing a guideline on capacity allocation and congestion management, as amended from time to time;
Calendar Quarter	means one of the four quarters of a calendar year, i.e. from January to March, April to June, July to September and October to December;
Central Administration Services	means the performance of a set of configuration and administrative tasks assigned to a Party in relation to a functionality of the XBID System, such as the shared order book, the CMM or the SM;
Change Control Procedure	means the procedure set forth in Appendix E (TSO Change Control Procedure);
Claiming Party(ies)	has the meaning set forth in Section 1.1.6, 2.c) of Appendix G;
CMM	means the capacity management module of the XBID System;
Common Decisions	means the decisions as described in Article 4.5.2.;
Concerned TSOs	shall mean the TSO(s) who has/have authorized Explicit Participant(s);
Confidential Information	has the meaning set forth in Article 12.2.;

Cooperation	shall have the meaning set forth in recital G;
Due Date	has the meaning set forth in Section 2.1, 2 of Appendix G;
ECP	means the energy communication platform used by certain TSOs;
ENTSO-E	means the European Network of Transmission System Operators for Electricity;
European Code of Conduct for Mediators	means the Code of Conduct for Mediators as set up by the European Commission;
Exit	means the event in which a Party terminates on its own initiative its participation to the Agreement or the event in which the concerned Party is excluded from the participation to the Agreement, in accordance with Article 9.;
Exit Date	means the date the Exit becomes effective;
Exit Plan	has the meaning set forth in Article 9.3.3.;
Exiting Party	means a Party that terminates on its own initiative its participation to the Agreement or the event in which the concerned Party is excluded from the participation to the Agreement, in accordance with Article 9.;
	<p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p>

	<p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p>
Global NDA	means the “Single DA and ID Coupling Observership and Non-Disclosure Agreement” to which the Parties are party and which entered into force on 23 February 2016;
Go-Live	means the start of the operation by a Party of the Single Intraday Coupling;
ICC	means the International Chamber of Commerce;
IDOA	means the Intraday Operations Agreement between the NEMOs and TSOs, setting forth their rights and obligations in respect of the implementation of CACM with respect to the Single Intraday Coupling that requires the cooperation of TSOs and NEMOs at European level, including the common operation and further development of the Single Intraday Coupling;
Intellectual Property Right or “IPR”	means any intellectual property right or other (property) right throughout the world, in all media, now existing or created in the future, for all versions and elements, in all languages, and for the entire duration of such rights, arising under applicable law, contract, or otherwise, and whether or not registered, registrable or perfected, including (a) rights in all inventions, discoveries, utility models, patents, reissues of and re-examined patents, or patent applications (wherever filed and wherever issued, including continuations, continuations-in-part, substitutes, and divisions of such applications and all priority rights resulting from such applications) now existing or hereafter filed, issued or acquired; (b) rights associated with works of authorship, including

	<p>database rights, copyrights, moral rights, copyright applications, copyright registrations, synchronization rights, mask work rights, applications and registrations; (c) rights in computer software and programs, source codes, or business methods; (d) rights in materials; (e) rights associated with trade marks, service marks, trade names, internet domain names, business names, logos, trade dress and the applications for registration and the registrations thereof; (f) rights relating to the protection of trade secrets, know-how and/or other Confidential Information; (g) design rights, whether registered or unregistered; and (h) rights analogous to those in this definition and any and all other proprietary rights relating to intangible property;</p>
Legal Provision	<p>means any applicable mandatory (including public policy) legislation or regulation or any mandatory decision of a competent authority, including the terms, conditions and methodologies as required under such legislation or regulation;</p>
Local Arrangement	<p>means:</p> <ul style="list-style-type: none"> (a) any agreement and/or consensus of opinion, whether in writing or orally; or (b) any Legal Provision or decision, <p>which applies to a subset of the Parties (as well as third parties as the case may be);</p>
Monthly Report	<p>means the report which details a Party's monthly costs which is submitted to the TSO SC for approval;</p>
NEMO	<p>means the nominated electricity market operator, as defined in article 2, 23 of CACM;</p>

Non-Operational Parties	means a Party for which Go-Live has not yet taken place pursuant to IDOA;
NRAs	means the respective national regulatory authorities designated at national level on the basis of article 35 of Directive 2009/72/EC of the European Parliament and the Council of 13 July 2009 concerning common rules for the internal market in electricity and repealing Directive 2003/54/EC or, in case of a country for which this directive does not apply, the national regulatory authorities designated at national level by similar legal provisions;
Observer	means a TSO that is not a Party to the Agreement and may be granted certain rights as mentioned in Article 11;
Operational Decisions	means decisions or actions taken as described in Article 4.5.2.;
Operational Parties	means the Parties for which Go-Live has taken place pursuant to IDOA;
Party	means any entity having signed or acceded to the Agreement, as identified on the identification pages or in an adherence agreement;
Paying Party(ies)	has the meaning set forth in Section 1.1.6, 2.c) of Appendix G;
[REDACTED]	[REDACTED]

Quarterly Account	has the meaning set forth in Section 1.1.6, 2. b) of Appendix G;
Quarterly Report	has the meaning set forth in Section 1.1.6, 2.a) of Appendix G;
RIO	means Rules of Internal Order attached as Appendix F;
Rollback	has the meaning set forth in Exhibit 16 (Rollback Procedure) IDOA;
Section	means a section of Appendix G;
Service Level Agreements or “SLAs”	has the meaning set forth in Article 5.2;
Service Provider	<p>means the service provider that has supplied the XBID System and provides maintenance and hosting services for it, at the date of signature of the</p> <p>██</p> <p>██</p> <p>██</p> <p>██</p> <p>██</p> <p>██</p> <p>██</p>
Shipping Module or “SM”	<p>shall mean the module of the XBID Solution providing information from trades concluded within XBID. The Shipping Module receives and processes data from the shared order books and the capacity management modules, enriches and filters the data and makes it available to the defined recipients;</p>
SIDC TSOs-Only Common Costs	<p>shall have the meaning set forth in Appendix G (Cost sharing, monitoring and settlement of SIDC TSOs-Only Common Costs);</p>

Single Intraday Coupling or "SIDC"	shall have the meaning set forth in article 2, 27 of CACM;
Target Model	has the meaning as set forth in recital A.;
TSO	means a transmission system operator having signed or adhered to the Agreement, as identified on the identification pages;
TSO Budget Monitoring Work Group or "TSO BM WG"	Is the body assigned by TSO SC to execute the tasks described in Appendix G.
TSO High Level Meeting or "TSO HLM"	has the meaning set forth in Article 4.1.1.;
TSO SC Secretary	has the meaning set forth in Section II of the Appendix F (Rules of Internal Order);
TSO Steering Committee or "TSO SC"	means the steering committee as referred to in Article 4;
Voting Member	means the Party that in accordance Article 4.5. is entitled to vote on the concerned decision;
Working Day	means any day other than a Saturday and a Sunday in which banks are open to the public for general business in the country or city of the Party that needs to perform the obligation, except if provided otherwise;
XBID	means cross border intraday;
XBID B2B Agreement	means the XBID TSOs & PXs Back to Back Agreement, entered into by the Parties on March 1 st 2015 and amended with effective date July 1 st 2016;
XBID Market APCA	means the XBID Market All Party Cooperation Agreement, entered into by certain Parties on July 15 th

	<p>2014, as amended by the first amendment to the XBID Market APCA on July 1st 2015 and by the adherence and second amendment to the XBID Market APCA on December 1st 2015;</p>
<p>XBID Market APCA ID SC</p>	<p>means the intraday steering committee under the XBID Market APCA;</p>
<p>XBID Solution</p>	<p>means the overall solution, including amongst others the high level architecture and system set-up, general specifications, systems (hardware and software) and algorithms, terms and procedures, required for the cooperation as described in Exhibit 4 IDOA;</p>
<p>XBID System</p>	<p>means the software and information and communication technology (ICT) applications (incl. hardware if any), as well as all relevant documentation pertaining thereto, developed by the Service Provider based on the requirements provided by certain NEMOs and TSOs, which is to be used for the performance of the Single Intraday Coupling to interact with amongst others the local trading systems of the NEMOs and TSOs' systems;</p>
<p>[REDACTED]</p>	<p>[REDACTED]</p>
<p>[REDACTED]</p>	<p>[REDACTED]</p>

2. Technical glossary:

Capitalised Term	Definition
Affected Party/Parties	NEMO(s) and/or TSO(s) which is/are affected by the reported issue(s);
Allocation	Attribution of the Cross Zonal Capacity;
Allocation Constraints	The constraints to be respected during capacity allocation to maintain the transmission system within operational security limits and have not been translated into cross-zonal capacity or that are needed to increase the efficiency of capacity allocation;
Allocation Information	Data exchanged as part of the Allocation process;
Allocation on Behalf	A special variation on the regular allocation process, where the allocation by the TSO is made on behalf of a Market Participant or a TSO;
Already Allocated Capacity (AAC)	Total power capacity that has been assigned for the trade after the results of the market trading session;
Backup (BUP) procedure	Procedure that describes the backup actions and workarounds that are available in order to overcome any issue without (significant) risk for breaching the applicable deadline;
Balance Responsible Party	The role that is responsible that the supply of energy corresponds to the anticipated consumption of energy in its balance area during a given time period and financially regulates for any imbalance that arises;
Balancing Group	A set of users in the Capacity Management Module of the XBID System, corresponding to companies;

Bug fix	A solution for an issue where maintenance is needed;
Business Day	A measurement of time that refers to any day in which normal business is conducted. This is generally considered to be Monday through Friday and excludes weekends;
Capacity Calculation Calculator	The entity with the task of calculating cross-zonal capacity, at regional level or above and of managing the validation process of the capacity calculation;
Capacity Calculation Region	The geographic area in which coordinated capacity calculation is applied;
Capacity Management Module (CMM)	A system containing up-to-date information on available cross-zonal capacity for the purpose of allocating intra-day cross-zonal capacity;
Central Change Administrator (CCA)	The role in charge to coordinate the Change Control Procedure. Unless otherwise agreed by within the OPSCOM, such role is selected on a yearly rotational basis among the members of the OPSCOM;
Central European Time (CET)	Standard time which is 1 hour ahead of the Coordinated Universal Time (UTC+01:00). All countries in the CET time zone observe DST (UTC+2) from 02:00 am on the last Sunday of March until 03:00 am on the last Sunday of October;
Change	An alteration, small or large, through which a Component becomes different;
Clearing Price	The price determined by matching the highest accepted selling order and the lowest accepted buying order in the electricity market;

<p>Clearing System</p>	<p>the CCP's IT system used to perform the task of clearing and settlement of all matched orders where the CCP acts as counter party to market participants;</p>
<p>[REDACTED]</p>	<p>[REDACTED]</p>
<p>Common Grid Model</p>	<p>A Union-wide data set agreed between various TSOs describing the main characteristic of the power system (generation, loads and grid topology) and rules for changing these characteristics during the capacity calculation process;</p>
<p>Component</p>	<p>A piece of software, hardware, reference data, XBID Operational Procedures or document (e.g. functional documentation) subject to this Change Control Procedure;</p>
<p>Contingency</p>	<p>The identified and possible or already occurred fault of an element, including not only the transmission system elements, but also significant grid users and distribution network elements if relevant for the transmission system operational security;</p>
<p>Continuous Trading Matching Algorithm</p>	<p>The algorithm used in single intraday coupling for matching orders and allocating cross-zonal capacities continuously;</p>
<p>Contract Halt/Allocation</p>	<p>[REDACTED]</p>
<p>Contract Modification</p>	<p>[REDACTED]</p>

Coordinated Capacity Calculator	The entity or entities with the task of calculating transmission capacity, at regional level or above;
Coordinated Net Transmission Capacity Approach	The capacity calculation method based on the principle of assessing and defining ex ante a maximum energy exchange between adjacent bidding zones;
Cross-border and XB Nomination	A schedule representing the commercial exchange of electricity between market participants in different scheduling areas;
Cross Border Trading service halt	██ ██
Cross-Zonal Capacity (CZC)	The capability of the interconnected system to accommodate energy transfer between bidding zones;
Day-Ahead Firmness Deadline	The point in time after which cross-zonal capacity becomes firm;
Day-Ahead Market Gate Closure Time	The point in time until which orders are accepted in the day-ahead market;
Day-Ahead Market Timeframe	The timeframe of the electricity market until the day-ahead market gate closure time, where, for each market time unit, products are traded the day prior to delivery;
Directional Halt/Allocation	██ ██ ██
Explicit Allocation	The allocation of cross zonal capacity only, without the energy transfer;
Explicit Market Participant	The entity or entities making use of the mechanism to allocate capacity through Explicit Allocation;

External commercial trade schedule	A schedule representing the commercial exchange of electricity between market participants in different scheduling areas;
External Communication	Email communication flow from the NEMOs and/or TSOs to Market Participants;
Fallback procedure	Procedure that is triggered when a deadline: <ul style="list-style-type: none"> - CZC and allocation constraints submission deadline - Allocation deadline - XB nomination deadline - Publication of results is (very likely to be) breached;
Firmness	A guarantee that cross-zonal capacity rights will remain unchanged and that a compensation is paid if they are nevertheless changed;
Flow	The allocated capacity per direction and per Scheduling Area Border to each ID trade and import/export shipper pair according to local shipping business rules;
Flow-Based Approach	A capacity calculation method in which energy exchanges between bidding zones are limited with power transfer distribution factors and available margins on critical network elements;
GCT	The point in time where cross-zonal capacity allocation is no longer permitted for a given market time unit;
GOT	The point in time when Cross-Zonal-Capacity between bidding zones is released for a given market time unit and a given bidding zone border;

High-Level (Functional) Architecture	Description of the system landscape, including the interfaces and data flows related to the Single Intraday Coupling and the associated processes;
Hot Fix	A solution for an issue where no maintenance window is needed;
Hourly Order	A product for continuous intraday coupling for constant energy delivery and for a period not exceeding one hour;
Hub Nomination	A schedule representing the commercial exchange of electricity within a scheduling area (=Delivery Area) between different market participants;
Implementation Manager	The role identified in the Implementation Plan as responsible for the implementation of the Change;
Implementation Plan	The form to be filled in that describes how the system will be tested, deployed, installed and transitioned into an operational system;
Import Shipper, Export Shipper	The entity or entities with the task of transferring net positions between different CCPs;
Incident	An unwanted event [REDACTED] [REDACTED] [REDACTED]
Incident Management Tool	[REDACTED] [REDACTED] [REDACTED] [REDACTED]
Incident Reporter	[REDACTED] [REDACTED] [REDACTED]

	<p>[REDACTED]</p> <p>[REDACTED]</p>
Individual Grid Model	A data set describing power system characteristics (generation, load and grid topology) and related rules to change these characteristics during capacity calculation, prepared by the responsible TSOs, to be merged with other individual grid model components in order to create the common grid model;
Interconnector	Transmission line which crosses or spans a border between countries and which connects the national transmission systems of the countries;
Internal commercial trade schedule	A schedule representing the commercial exchange of electricity within a scheduling area between different market participants;
Internal Communication	Email communication flow between the NEMOs and TSOs;
Intraday Cross-Zonal Gate Closure Time	The point in time where cross-zonal capacity allocation is no longer permitted for a given market time unit, as defined in article 2, 39 ^o CACM;
Intraday Cross-Zonal Gate Opening Time	The point in time when cross-zonal capacity between bidding zones is released for a given market time unit and a given bidding zone border, as defined in article 2, 38 ^o CACM;
Intraday Market	Market timeframe between Intraday Cross Zonal Gate Opening Time and Intraday Cross Zonal Gate Closure, where commercial transactions are executed prior to the delivery of traded products;

Intraday Market Timeframe	The timeframe of the electricity market after intraday cross-zonal gate opening time and before intraday cross-zonal gate closure time, where for each market time unit, products are traded prior to the delivery of the traded products, as defined in article 2, 37° CACM;
Issue	The cause, or assumed cause, of an Incident;
Last Hour Flow (LHF)	Traded capacity of the Last Hour of the previous day, necessary due to any ramping restrictions and optimizing volume coupling calculation;
Light Notification	A request for Change to XBID procedures or documents subject to this Change Control Procedure where the Change has no material effect on the procedure or document. This is intended for grammar or other small non-intrusive changes with no associated implementation activities, or no material implications for the rights and obligations of the Parties, besides issuing a new version of the procedure or document;
Local	A level that is not common to all Parties of the Single Intraday Coupling;
Local Change Administrator (LCA)	The role appointed by each XBID Member as single point of contact for the Party, being involved for the purpose of the Change Control Procedure;
Local Tools	The IT Systems of individual Parties;
LTP/hub	This is the functional entity of a PX operating in a specific scheduling area;

Maintenance Window	A period of time designated in advance, during which preventive maintenance that could cause disruption of service may be performed;
Market Congestion	A situation in which the economic surplus for single day-ahead or intraday coupling has been limited by cross-zonal capacity or allocation constraints;
Market Coupling Operator (MCO) Function	The task of matching orders from the day-ahead and intraday markets for different bidding zones and simultaneously allocating cross-zonal capacities, as defined in article 2, 30 ^o CACM;
Market Coupling (MC)	Implicit auction process to allocate the transmission capacities in a defined region;
Market Participant (MP)	Entity authorized by a NEMO to submit Orders;
Market Time	Central European summer time or central European time, whichever is in effect;
Market Time Units	The period for which the market price is established or the shortest possible common time period for the two bidding zones, if their market time units are different;
Matched Orders	All matched, buy and sell, orders by the price coupling algorithm or the continuous trade matching algorithm;
Matching	The trading mode through which sell orders are assigned to appropriate buy orders to ensure the maximisation of economic surplus for single day-ahead or intraday coupling;
Matching results	All matched, buy and sell, orders within a trade made by the price coupling algorithm or the continuous trade matching algorithm;

Micro releases	A new release of the software with multiple hotfixes that can be installed through a maintenance planned on short notice and with a reduced number of testing phases [REDACTED];
Modification	A request for complex Changes, with a medium/high Risk category, affecting multiple Components, or Components which are under the responsibility of more than one Party;
Necessary Party/Parties	Party/Parties whose presence and active cooperation is required during the IC in order to find the solution to the issue(s). This can be a NEMO or TSO or service provider;
NEMO Modification	A request for complex Changes (only affecting the SOB and the NEMOs), with a medium/high Risk category, affecting multiple NEMO Components, or Components which are under the responsibility of more than one NEMO but with no impact to the TSOs;
Net Position (NP)	The netted sum of electricity exports and imports for each market time unit for a bidding zone;
Net Transfer Capacity (NTCs)	The maximum exchange program between two areas compatible with security standards applicable in both areas and taking into account the technical uncertainties on future network conditions;
Nominated Electricity Market Operator (NEMO)	An entity designated by the competent authority to perform tasks, as defined in CACM, related to single day-ahead or single intraday coupling;
Nomination	The notification of schedules to related TSOs;
Nominating Parties	The entities that perform the Nomination process;

Nomination On Behalf	Nomination on behalf means the creation of (parts of) a Schedule by a TSO or another entity, instead of a Nomination by the respective Scheduling Agent;
Non-Standard Intraday Product	A product for continuous intraday coupling not for constant energy delivery or for a period exceeding one market time unit with specific characteristics designed to reflect system operation practices or market needs, for example orders covering multiple market time units or products reflecting production unit startup costs;
Normal (NOR) procedure	Procedure that describes the normal processes and the normal timeline of the Single Intraday Coupling;
Notification	A request for i) Changes, with a very low/low Risk category, affecting a small number of Components owned by one or more Parties and ii) Changes only to local items with no identified impact on common items;
NTC Method	The capacity calculation method based on the principle of assessing and defining ex ante a maximum energy exchange between adjacent bidding zones;
Operational Security Limits	The acceptable operating boundaries for secure grid operation such as thermal limits, voltage limits, short-circuit current limits, frequency and dynamic stability limits;
[REDACTED]	[REDACTED]

Order	An intention to purchase or sell energy or capacity expressed by a market participant subject to specified execution conditions;
Originator	Party submitting an RFC;
Other (OTH) procedure	Procedures that deal mostly with organization and communication aspects;
Physical Congestion	Any network situation where forecasted or realised power flows violate the thermal limits of the elements of the grid and voltage stability or the angle stability limits of the power system;
Post-Coupling Processes	Processes that follow after the calculation and validation of the Market Coupling Results, mainly related to the Scheduled Exchanges and the Congestion Income;
Pre-Coupling	Processes prior to the calculation of the Market Coupling Results, related to the CZCs and Allocation Constraints;
Price Clearing	The price determined by matching the highest accepted selling order and the lowest accepted buying order in the electricity market;
Ramping Constraints	Term used for the maximum change of the power flow on an Interconnector between two consecutive hours;
Reliability Margin	The reduction of cross-zonal capacity to cover the uncertainties within capacity calculation;
Remedial Action	any measure applied by a TSO/NEMO and/or several TSOs/NEMOs, manually or automatically, in order to maintain operational security and/or the Single Intraday Coupling;

REMIT UMM	Urgent Market Messaging (UMM) that have been developed to comply with the Regulation on Wholesale Energy Market Integrity and Transparency (REMIT);
Request for Change	A completed form included in the Change Control Procedure XBID_JOINT_OTH_03 that is required for triggering the Change Control process;
Risk Case	A specific deviation from the normal process, the handling of which is explicitly covered in the Normal and Backup procedures;
Scenario	The forecasted status of the power system for a given timeframe;
Schedule	A reference set of values representing the generation, consumption or exchange of electricity for a given time period;
Scheduled Exchange	An electricity transfer scheduled between geographic areas, for each market time unit and for a given direction;
Scheduled Exchange Calculator	The entity or entities with the task of calculating scheduled exchanges;
Scheduled Exchange Verification	For a B2B physical clearing, Explicit and Implicit Allocation Results between the 2 involved Scheduling Areas have to be known by the TSO post-coupling systems. With this information TSOs check bilaterally information consistency between the allocated capacities on each side of the border;
Scheduling Agent	The entity or entities with the task of providing schedules from market participants to TSOs, or where applicable third parties;

Scheduling Area Border	A border between two scheduling areas having one or more Interconnector(s);
SFTP	File Transfer Protocol using certain secure connection;
Shared Order Book	A module in the continuous intraday coupling system collecting all matchable orders from the NEMOs participating in single intraday coupling and performing continuous matching of those orders;
Shipping Agent	Entity or entities performing the function of transferring the Net Position(s) between different CCPs;
Shipping System	Shipping Agent's IT system used to perform the task of transferring net positions between different CCPs;
Single Day-Ahead Coupling	The auctioning process where collected orders are matched and cross-zonal capacity is allocated simultaneously for different bidding zones in the day-ahead market, as defined in article 2, 26 ^o CACM;
Single Intraday Coupling	The continuous process where collected orders are matched and cross-zonal capacity is allocated simultaneously for different bidding zones in the intraday market, as defined in article 2, 27 ^o CACM;
Structural Congestion	Congestion in the transmission system that can be unambiguously defined, is predictable, is geographically stable over time and is frequently reoccurring under normal power system conditions;

Ticket System	System for registering issues in the Single Intraday Coupling;
Trade	One or more matched orders, as defined in article 2, 25° CACM;
TSOs Post-Coupling Module	The TSO's IT system used to perform the task of receiving schedules from Scheduling Agents, creating schedules on behalf of Scheduling Agents and verification of these schedules;
TSOs Pre-Coupling Systems	The TSO's IT system used to perform the task of sending cross zonal capacities and allocation constraints to the CMM;
Urgent Modification	A Modification with the addition that this Change is in response to a high priority event. The procedure for Modifications will be followed but with reduced timing to reflect the urgent nature of the Change;
XBID Incident Log	Depository in which incidents related to the Single Intraday Coupling are registered;
XBID Member	A TSO or NEMO connected to the XBID System
XBID Procedures	The operational procedures that are executed as part of the Single Intraday Coupling;
XBID System	The central IT system with which the Single Intraday coupling is run;

The definition/meaning of other important technical terms can be found here:
