# PICASSO & MARI

On 13 July, PICASSO and MARI (implementation projects for the aFRR- and mFRR-Platforms) organised a detailed **public workshop**, covering the respective balancing processes and products, the bidding design, the activation optimisation functions, pricing principles, accession roadmaps and timeline, gate closure times and monitoring and reporting.

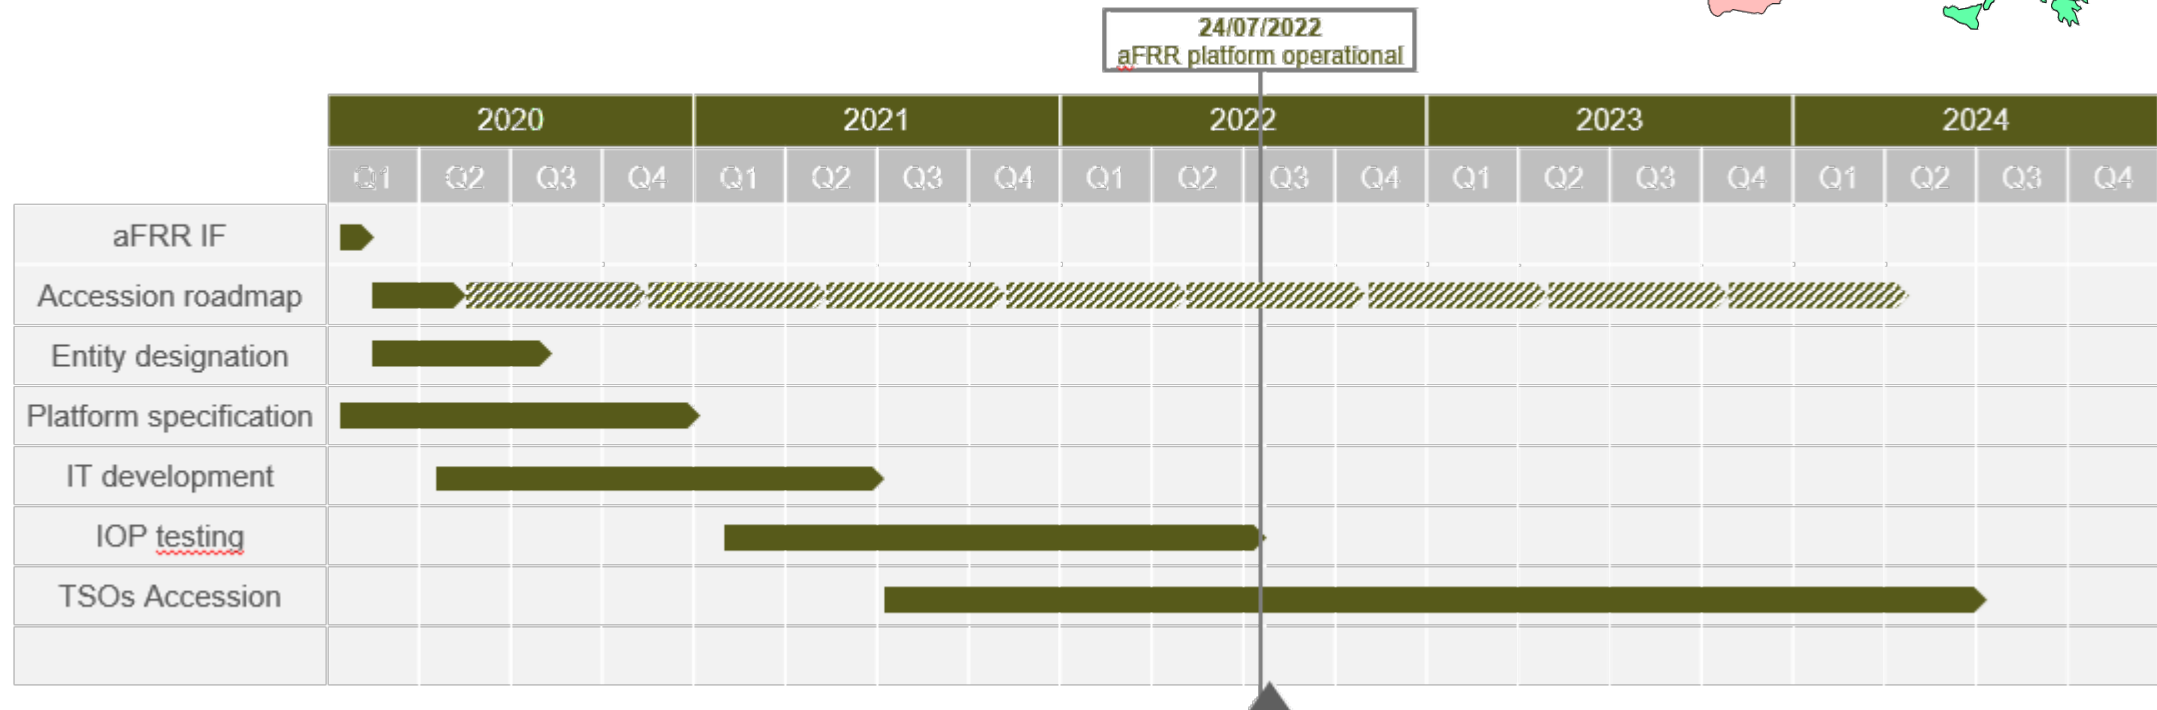

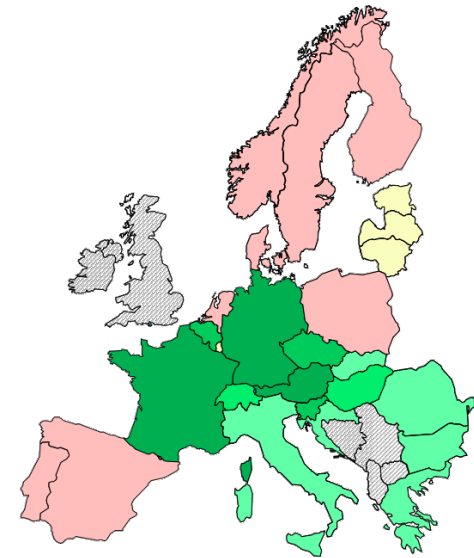

The workshop was attended by **507 participants** – thank you for your attendance!

The balancing platforms will organise public workshops every year.

<sup>1</sup> - Baltic TSOs connection time to the mFRR-platform is conditional on the neighbouring TSOs – Baltic TSOs aim not to operate Baltic mFRR market inefficiently in the decoupled mode from the other areas on the mFRR-platform. Feasible time for joining will be analysed by Baltic TSOs.  
<sup>2</sup> For Denmark, Finland, Norway and Sweden accession is possible Q3 2023-Q2 2024
