## Overview of the rules for suspension and restoration

Outline the relevant rules for suspension and restoration

## Survey: process and results

Relate the approach followed to gather TSOs specifics on the rules for suspension of restoration of market activities

## Assessment of different rules for suspension of restoration of market activities

Assessment of the areas in which TSOs see a feasible harmonisation

## Stakeholder's engagement

Describe the involvement of stakeholders in the different stages of its drafting

A) Does/Do your TSO(s) consider suspension of market activities in case of a **blackout**?

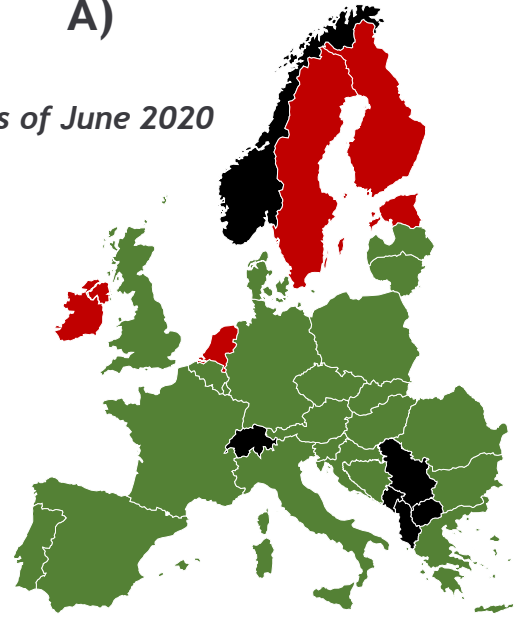

B) Does/Do your TSO(s) consider suspension of market activities in case of **emergency state**?

C) Does/Do your TSO(s) intend to suspend market activities due to the **restoration process**?

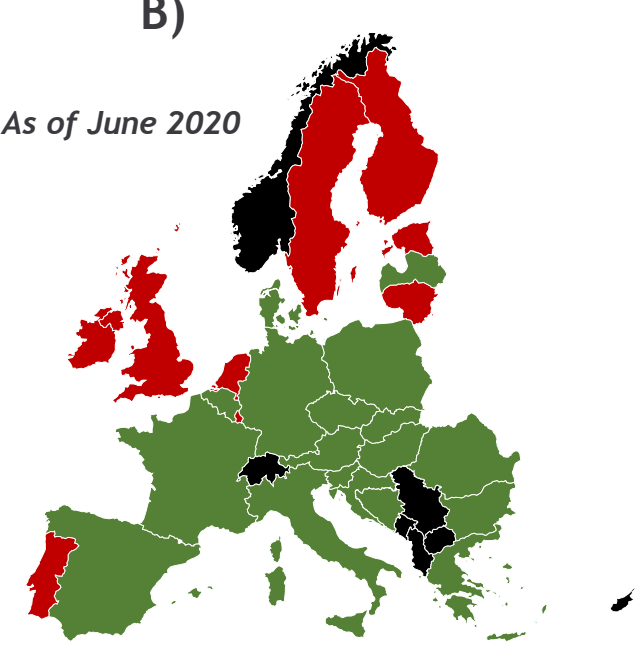

D) Does/Do your TSO(s) intend to suspend market activities due to **unavailability of tool/communication means**?

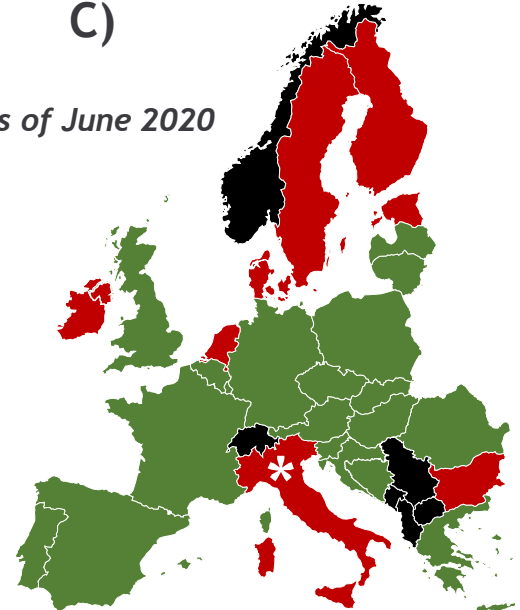

A)  
As of June 2020

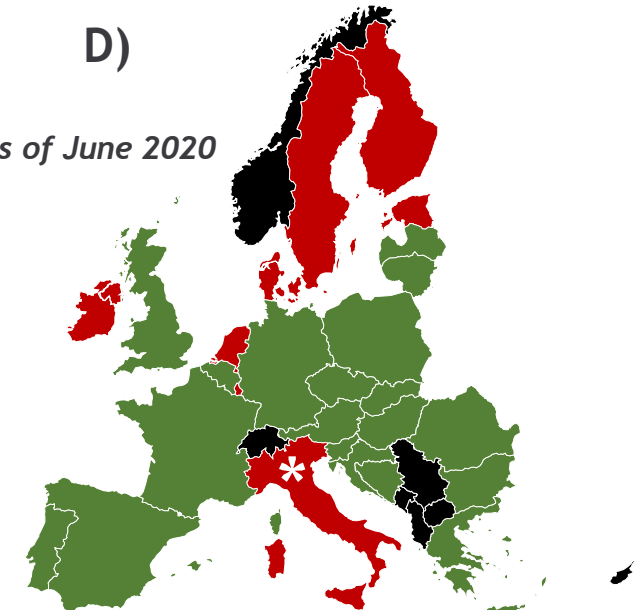

B)  
As of June 2020

C)  
As of June 2020

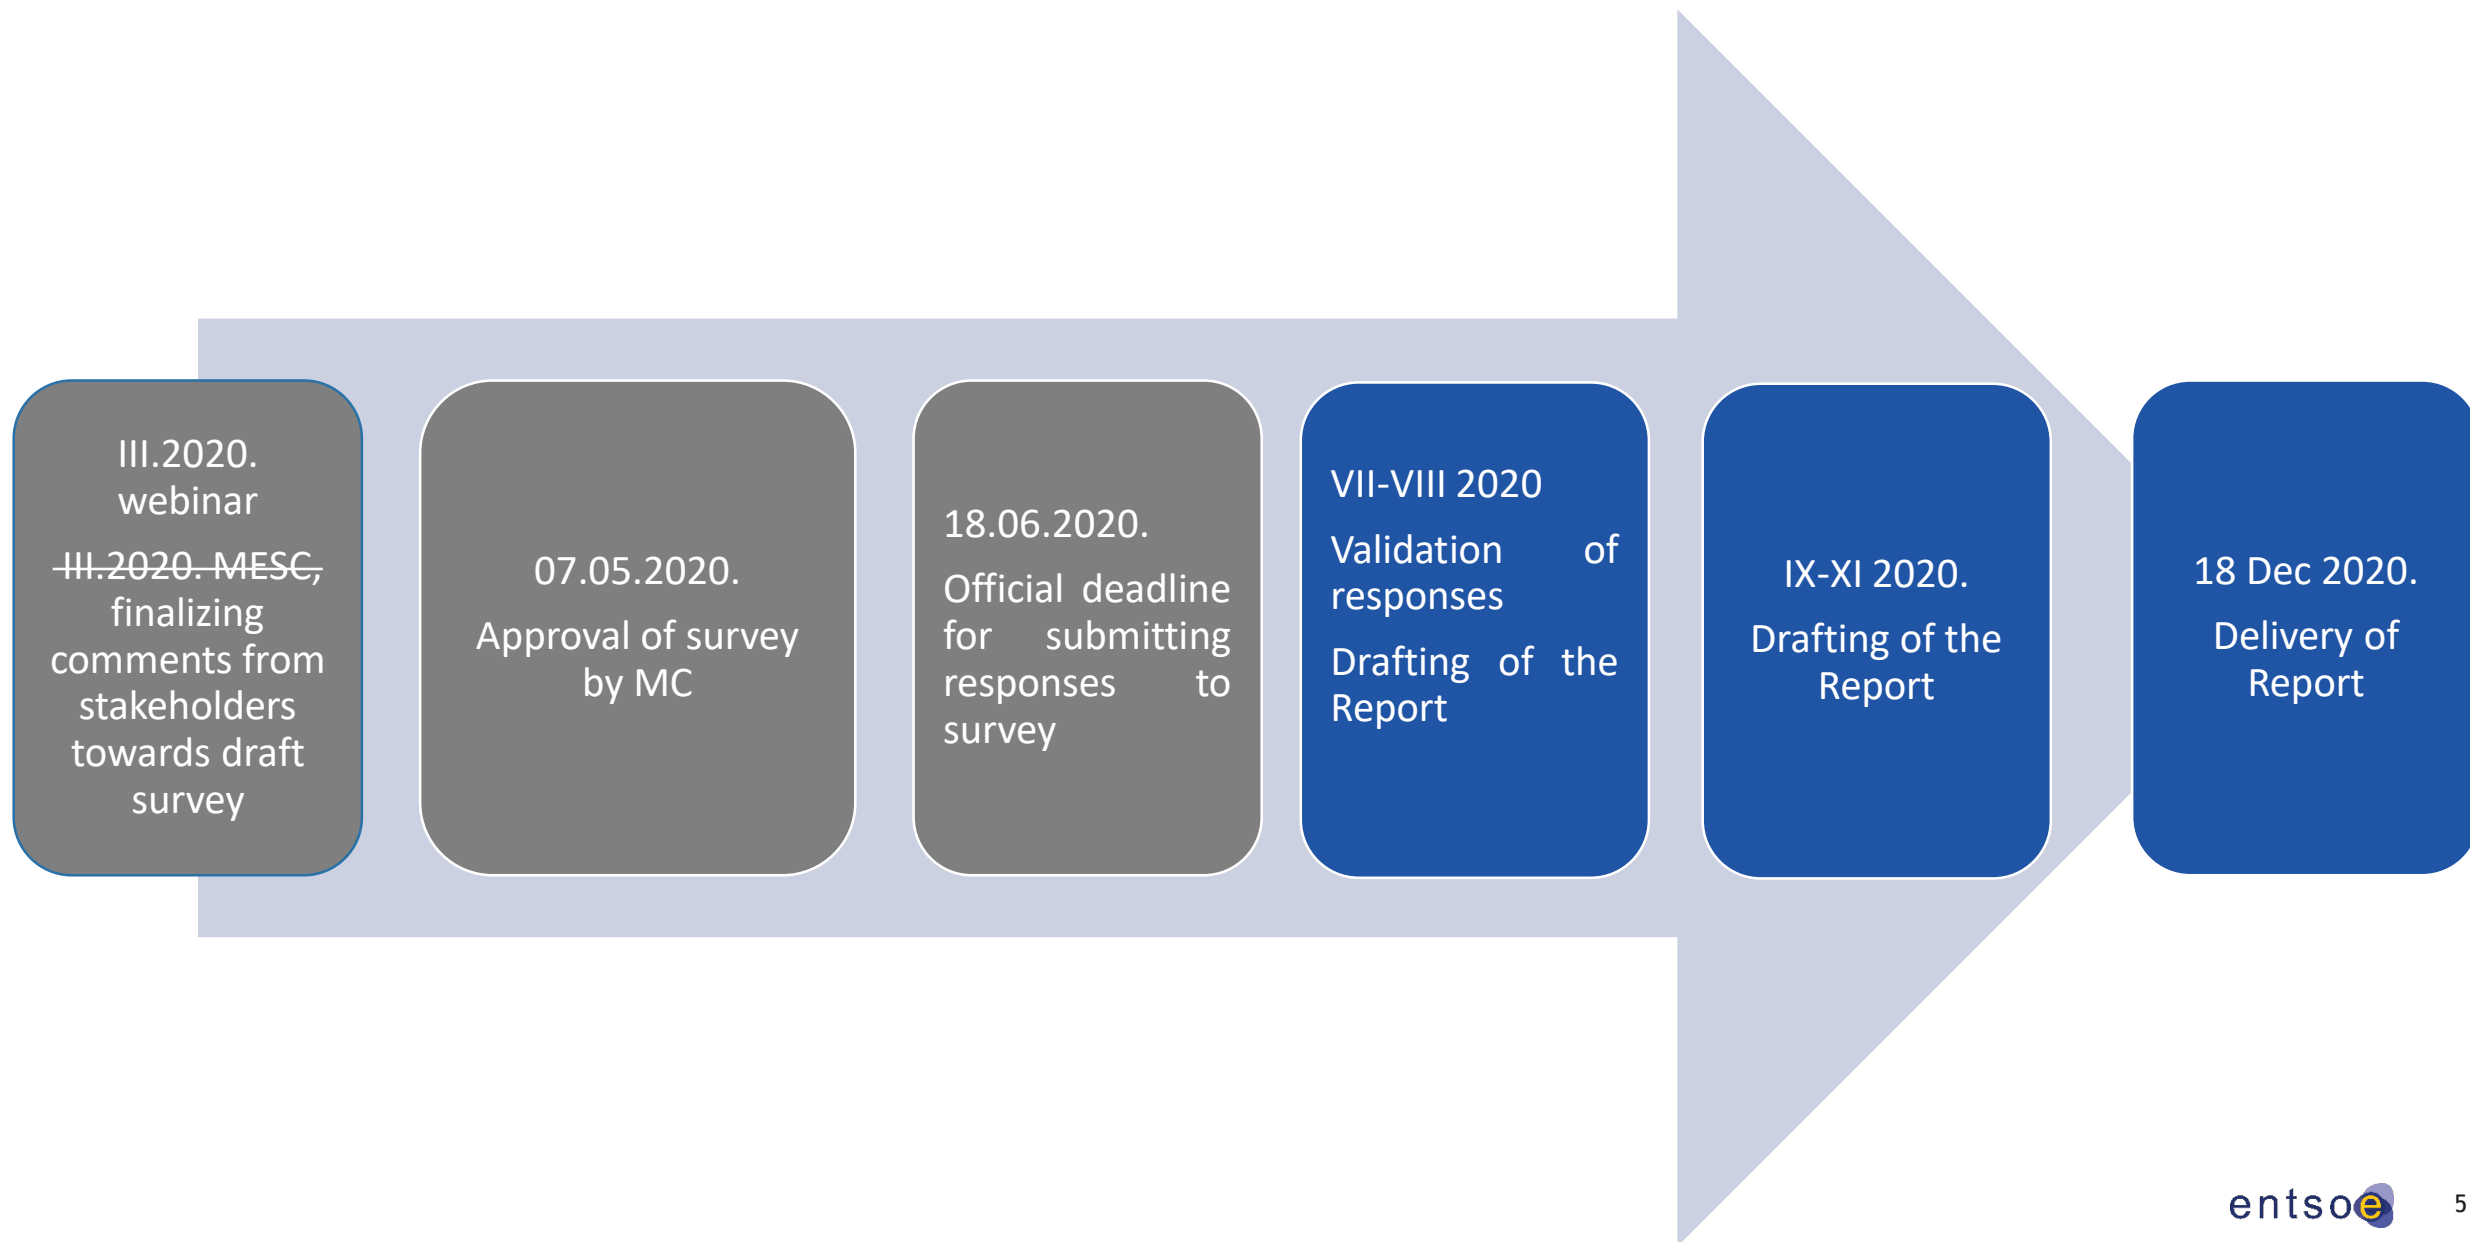

D)  
As of June 2020

\* Comments:

**Italy:** Market activities could be suspended both in case of unavailability of tools/communications means and during the restoration process, but these two conditions alone are not sufficient to proceed with a suspension.

## Draft timeline – after February 2020:

**Thank you for your attention**
