

All TSOs Decisions – Written Voting Procedure on the Amendments to the Methodology for Coordinated Security Analysis (SO GL Art. 75) for public consultation

Date: 13 August 2020

Procedure: via written voting procedure

Decision

All TSOs, as defined in the SO GL, involved in the development of the methodology for coordinating operational security analysis:

- Approve the amendments to the methodology for coordinating operational security analysis and the corresponding explanatory note for public consultation.

Participation

The proposal takes into account the TSOs from the European Union Member States (EU MSs) bound by the SO GL Regulation is as follows:

- **24** of the EU MSs TSOs bound by the SO GL Regulation cast their vote.

The participation requirement provided in the SO GL Regulation for the proposal is therefore complied with, however the noted “absences” have had a negative impact on the majorities achievement.

In addition, **3** TSOs from non-EU countries, members of ENTSO-E, cast their vote.

Voting results - Majorities

22 EU TSOs votes were casted in favour of the decision;

2 non-EU TSOs votes were casted in favour of the decision;

1 vote was casted as abstention;

2 votes were casted against the decision;

8 EU TSOs did not cast their votes or cast them after the deadline

In order for the decision to be adopted, unanimity should be the first goal. Alternatively, an approval by a qualified majority is necessary in accordance with the All TSOs Voting Process and the SO GL Regulation (55% of first part of voting power, i.e. number of Member States, and 65% of second part, i.e. Member States’ population).

The majority requirement was reached as follows:

- formal voting 72.44 % of first part of voting powers and 93.27 % of second part;
- informal voting 63.13 % for the first part and 90.65 % of the second part of the voting powers.

The above decision has therefore been approved by **ALL TSOs on 13 August 2020**.
