

# Update on NEMO Committee activities

14/12/2020

23<sup>nd</sup> MESC meeting

# CONTENTS

1. Publication of aggregated curves
2. Regional procedures publication

# 1. Publication of aggregated curves

First step: links in the NC website to data will be published in the individual NEMOs' dedicated webpages (it will start operating before Christmas)

Enduring solution: Timeline for the enduring detailed by NEMO DA SC.

# 1. Publication of aggregated curves

## Aggregated Curves

According to allNRA's request the links to the aggregated anonymized market data can be reached through the map.

The image shows a map of Europe with three callout boxes. The first box, titled 'NEMOs Operated', lists three entities: epexspot (with logo and URL www.epexspot.com/en/), Nord Pool (with logo and URL www.nordpoolgroup.com/), and Nasdaq (with logo and URL www.nasdaq.com/en). The second box, also titled 'NEMOs Operated', lists epexspot (with logo), Nord Pool (with logo), and Nasdaq (with logo). The map highlights the regions of France, the Nord Pool region (Scandinavia), and the Nasdaq region (Central Europe).

## 2. additional publication at regional level

- As foreseen in the Algorithm methodology, operational contracts related to SDAC and SIDC have been published.
- After having been asked by CWE parties on the necessity to publish additional information at regional level, ACER suggested all NEMOs to consult with market parties on their need to receive additional information on regional operational agreements to understand the functioning of single day-ahead and single intraday couplings.
- Stakeholder views are welcome.
