Demand response: Update on the outcome of the public consultation and next steps

MESC meeting

14 September 2022

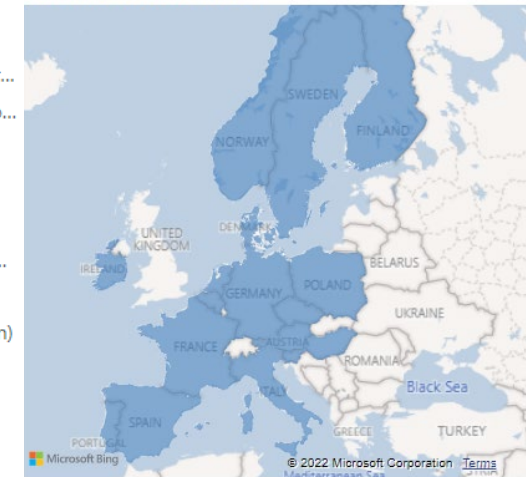

Overall opinion on the Framework Guideline

Activities represented

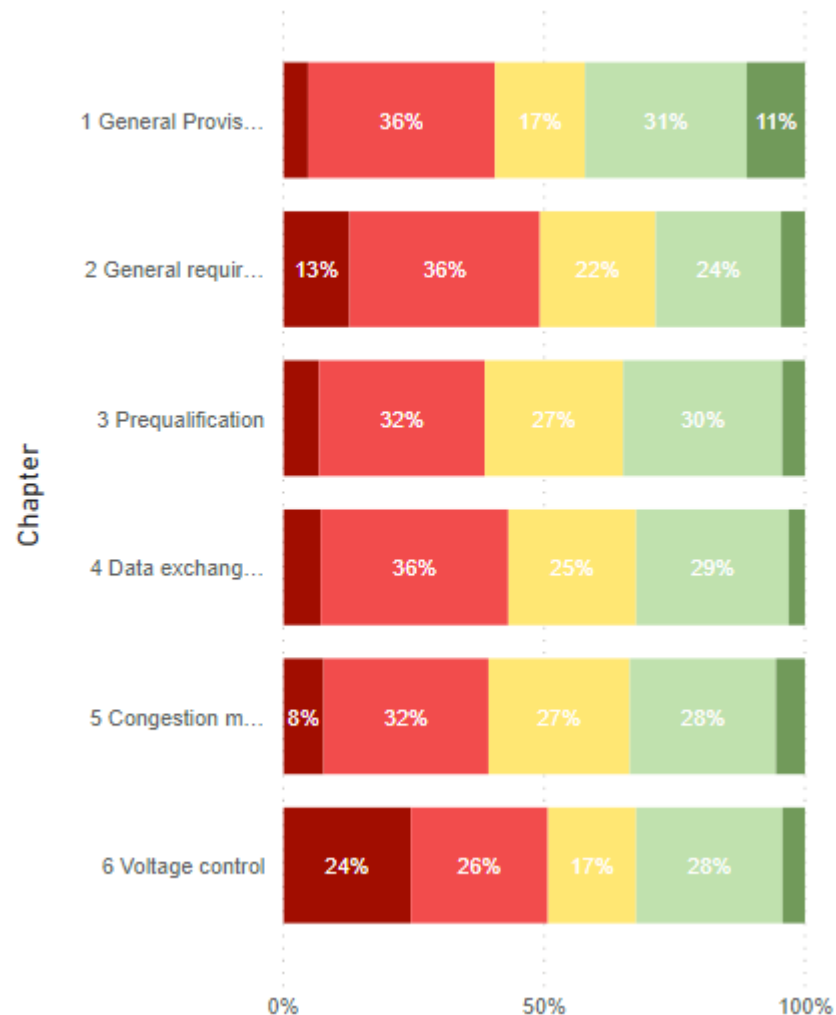

Contributing countries

Public consultation responses

- The overall percentage reflects the responses **over the sum of all paragraphs**; the big percentage of the “no opinion” response can be explained by the diversity of the topics of the FG (in the following slides “no opinion” is removed in order to better reflect the level of (dis)agreement).
- Although no opinion, some answers included comments, so we need to be careful when assessing the contributions.

Overall opinion on Chapters

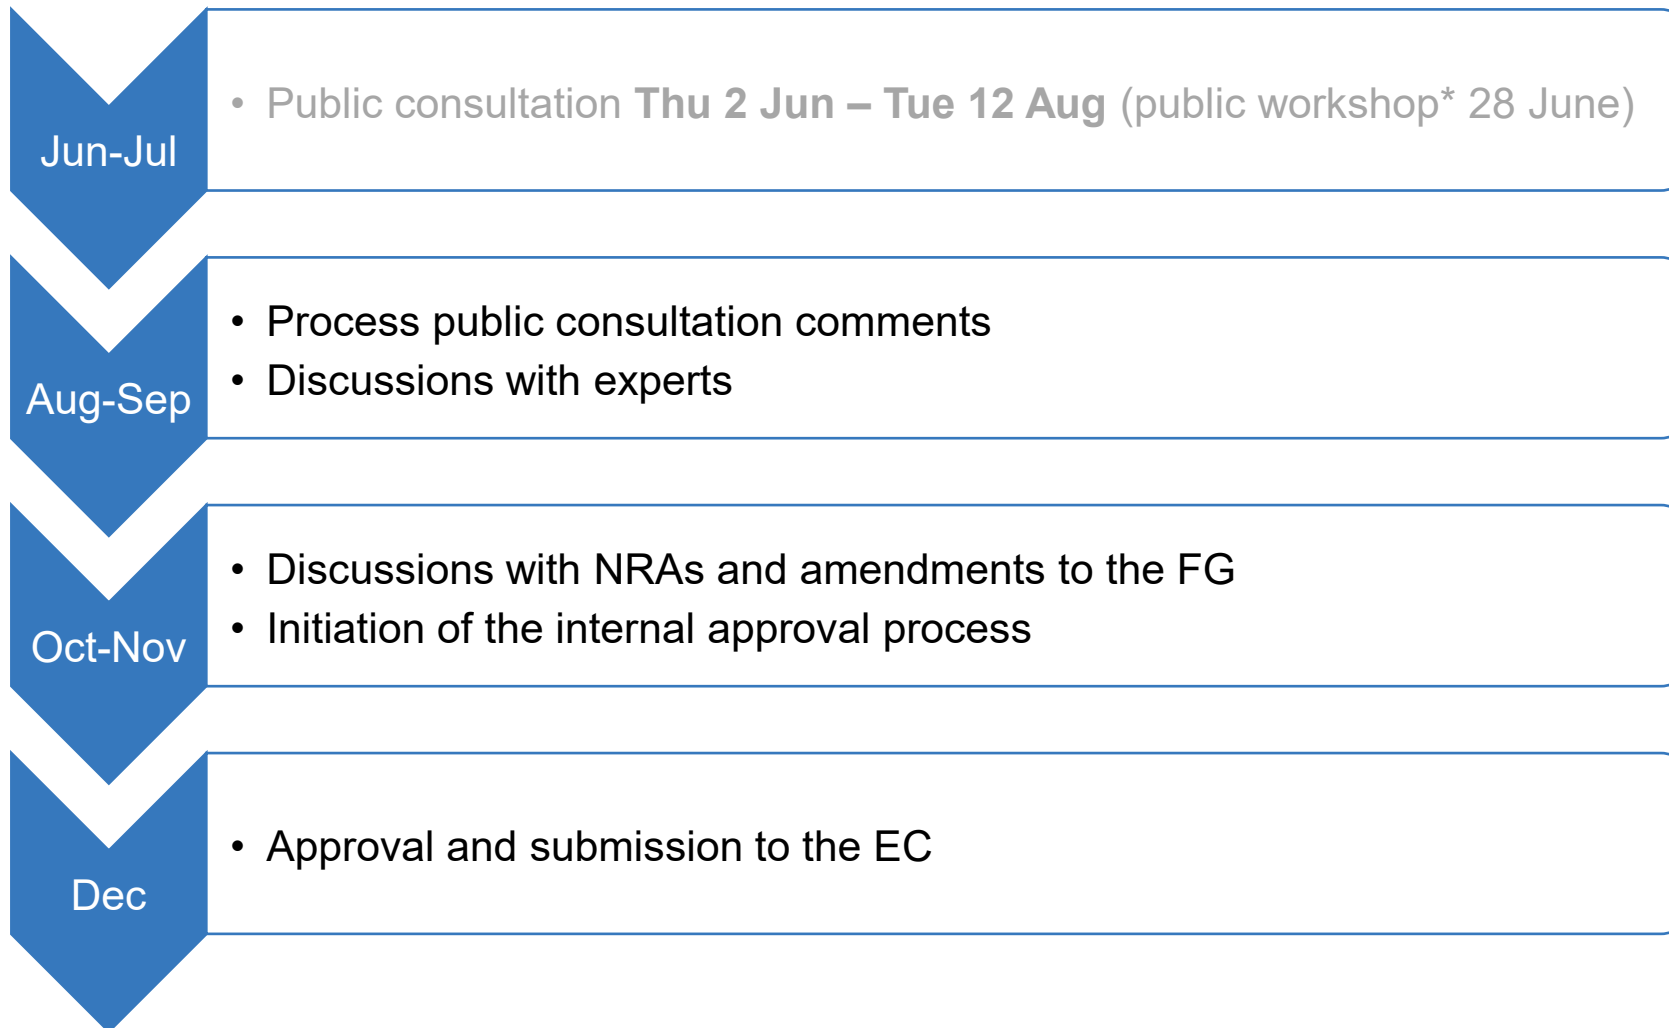

- The overall percentage reflects the responses **over the sum of all paragraphs**; so it is not necessarily reflecting of the level of agreement with the whole chapter/section.
- Different parties have **assessed differently the agreement/disagreement**, even if the comment was the “same”: e.g. “we agree but we propose the following changes” for some meant disagree and for some agree.
- **Disagreement** sometimes could mean towards **two opposite directions**, so even if they are both counted “together” they may mean more/less harmonisation (for example).

The draft DR FG is **work in progress**. The inputs will be used to **improve the draft** for the final version.

We are still processing the contributions, so the following is rather high-level and **not a unanimous claim** from the stakeholders.

- **Softened up processes** for European and national implementation to allow for a more **gradual approach** – i.e. **continued experimenting** in order not to set the final market design too early.
- Concerns about the **legal basis** for the scope of the DR FG (rules for **Directive** articles, scope should only cover **Demand Response**, new NC vs amendments to existing **NC/GL**).
- **Concerns** and request for **clarifications** in many areas of the FG (aggregation models, sub-metering, FCR, SO-owned storage, ex-post verification in prequalification, SO-service provision tool, data disaggregation, locationally tagged bids from WS markets for SO services, voltage control)
- Many **smaller specifications** that may improve the draft...
- ...and also **support!**

FG drafting – High-level planning

**You may find the presentation and the recording of the workshop [here](#).*

Thank you. Any questions?
