

ACER monitoring 2023

Disclaimer: the suggestions below are tentative at this stage

Instead of publishing, towards the end of the year, an extensive MMR covering many issues, we will publish several thematic reports, covering the same scope than the old MMR, during the year

- to provide more focus

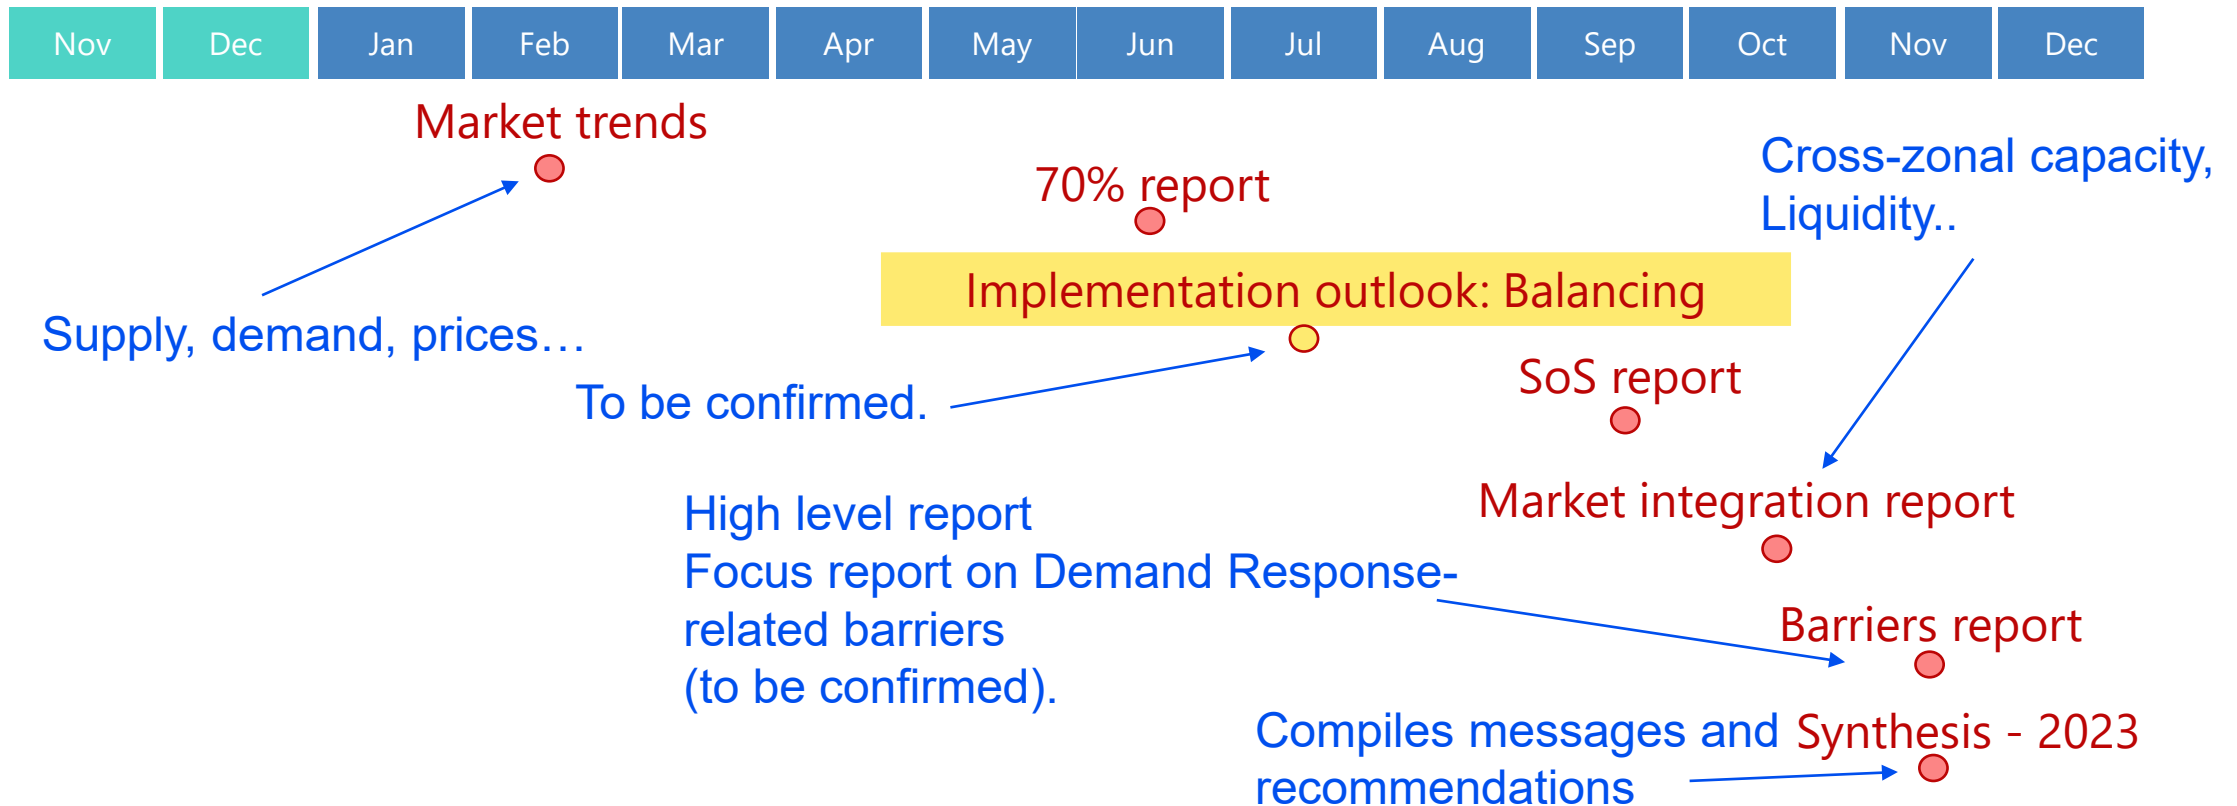

We will also cover new topics, or ad-hoc focus on some subtopics.

- *e.g. balancing implementation monitoring, focus on demand-response related barriers, emergency measures...*

- We also wish to trigger more targeted stakeholders experts' feedback:
 - Ex ante, when selecting ad-hoc focuses for the upcoming monitoring edition;
 - Ex post, via workshops or consultations.

Disclaimer: the suggestions below are tentative at this stage

As FCA, CACM are being amended, ACER prioritises BAL implementation monitoring – Any views ?
