

# Public consultation planning for 2023

Regulation	Article	Methodology	Estimated period
CACM	43(1), 56(1)	Scheduled exchanges	January-February
Electricity	37(1)(j)	RCC task on regional sizing of reserve capacity	April (common)
Electricity	37(1)(k)	RCC task on regional procurement of balancing capacity	
EB	38(3)	Harmonised allocation of cross-zonal capacity (HCZCA)	
FCA	51(1)	Harmonised Allocation Rules (HAR)	April-May
CACM	73(1)	Congestion income distribution methodology (CIDM)	September
CACM	37(5)	SDAC algorithm methodology	December

ACER public consultation usually lasts 3-4 weeks; the estimated period indicates the period within which the public consultation could be held.

This planning is based on the estimated (i.e. known so far) dates for ACER receiving the respective proposals; these dates are not binding, and they are only communicated for general planning purposes to the stakeholders.

ACER may receive additional proposals in 2023, either regional ones referred to ACER for decision by the respective NRAs, or European ones for already approved methodologies, which need amendments (not expected ones; the need for amending them could be identified in the course of the next months).
