

# Reporting on the 70% min. target

## Initial feedback to ongoing work on harmonization by ACER and NRAs

TSOs welcome that the work on finding a joint view/agreement on the monitoring of the 70% min. target continues and understand that 'joint view' shall include TSOs. Yet, TSOs are surprised of not having been invited by ACER to the technical discussions in an early stage, even if a common view from All NRAs and ACER is welcomed.

TSOs are in the center of the process:

- Have the technical expertise
- Are responsible for capacity calculation
- Provide the data requested by ACER
- Expressed their willingness to engage on further discussions (MESC, answered to Market parties...)
- Report on the 70%

Regarding the next steps:

- ENTSO-E will continue the publication of its 70% report (as part of the ENTSO-E market report), aiming for improvement of the report to provide a comprehensive picture to all stakeholders
- Confirm their willingness to engage on further discussions with ACER and the NRAs.
