

MESC

1st June 2022

3.3 Update on the automatic increase of
the max DA harmonised price and review of
HMMCP methodology

For MESC

1 June 2022

Background:

In line with **the Harmonised Maximum and Minimum Clearing Prices (HMMCP) Methodology** in accordance with Article 41(1) of Commission Regulation (EU) 2015/1222 of 24th July 2015 (CACM Regulation), the harmonised maximum clearing price for Single Day-Ahead Coupling (**SDAC**) shall be increased by 1,000 EUR/MWh if the clearing price exceeds a value of 60 per cent of the harmonised maximum clearing price for SDAC in at least one market time unit in a day in an individual bidding zone or multiple bidding zones.

on 3rd April 2022 (delivery date 4th April) in France high prices of 2,712.99 and 2,987.78 EUR/MWh reached, in hours 8 and 9, respectively.

(on 3rd April) The harmonised maximum clearing price for SDAC was +3,000 EUR/MWh, which was increased to +4,000 EUR/MWh.

The new maximum clearing price was applied in all bidding zones that participate in SDAC from 10th May 2022 (first trading session).

NEMOs have launched a public consultation to review the HMMCP methodology for SDAC and SIDC.

The consultation was launched on 24 May and will close on 15 July.

The current SDAC HMMCP methodology is available on the NEMO Committee webpage [here](#).
