

## **BE GCT shift from H-60 to H-55 as of 13 January 2021**

As provided for in Article 7 of the [RRIF](#), with the end of the 12 months interim period since the entry into operation of the RR-platform, the gate closure time for RR standard product energy bids will shift from 60 to 55 minutes before the period which is concerned by the activation of the RR standard product to satisfy the TSO balancing energy needs. This change will be performed on 13 January 2021.

The balancing energy gate closure time (BE GCT) is the point in time at which Balancing Service Providers (BSPs) are no longer permitted to submit or update a balancing energy bid to their connecting TSO.
